

New Tool for Communicating with Students' Guardians

From this time forward, Karlstad Municipality will communicate with you as the guardian of a school-age child in a new way. The communication tool we will now use is a modern, digital learning management system called Haldor Education.

As their guardian, Haldor Education lets you both follow and play an active role in your child's learning and development, receive news from their school and communicate with their mentor (*mentor*) or subject/course teachers (*ansvarig pedagog*).

Haldor Education lets guardians:

- easily see current information, e.g. through news or lesson-planning items
- see what assignments your child is currently working on and their due dates
- view your child's assessments
- send messages directly to your child's mentor or subject/course teacher
- translate news items, messages, lesson plans and information into a language other than Swedish and have them read aloud.

How to log in

You log in using e-identification such as Mobile BankID. If you are unable to log in using e-identification, please contact the child's teacher for further instructions.

App for guardians

The *Haldor Förälder* app gives you access to Haldor Education on your mobile phone and notifies you about activities relevant to your child. This app is available for both Android and iOS devices. Search for "Haldor" in the App Store or on Google Play to download the app.
